PETITE III *Delicate & Decadent*

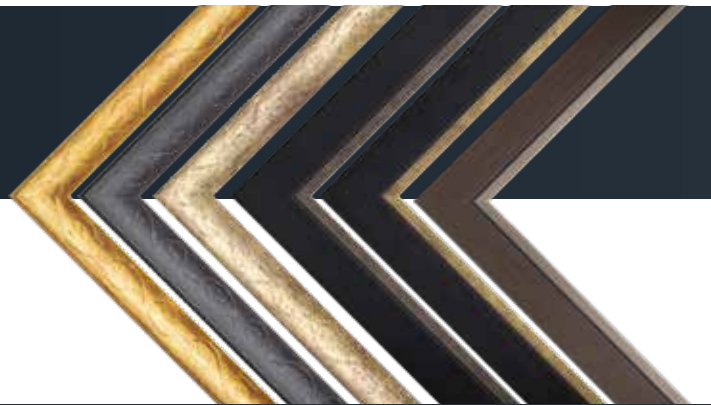

The Petite moulding collection features versatile finishes on small, transitional profiles. It is ideal for projects where a delicate moulding is needed but not at the expense of style and impact. Petite is a mixture of well-designed profiles that include clean-lined contemporary shapes as well as soft scoops. The subtle ornamentation of the scoop profile lends itself to traditional styling that is comfortable in modern settings. Petite's design forward architecture combined with its decadent palette of subtle alloys and deep blacks delivers very exciting styling opportunities.
